# Product Specification

## DMT Quartz Dust, different particle size

**TÜV NORD Systems GmbH & Co. KG**
**Plant & Product Safety**
**Refrigeration & Air Quality**

**Am TÜV 1**
**45307 Essen, Germany**

| | |
|---|---|
| **1. General description:** | Test dust for use in filter and environmental tests. More information can be found in the Downloads section. |
| **2. Composition:** | Please let us know, which particle size range you need. |
| **3. Transport and Storage:** | Partial segregation may occur during transport and storage. It is therefore recommended to homogenize the DMT Quartz Dust, different particle size before use, which can be achieved by mixing with a laboratory tumbler mixer. Please store in a dry and airtight original container. |
| **4. Quality ensurance:** | In order to achieve reproducible quality, the raw materials and production are strictly controlled. The following quality controls are carried out:<br><br>Monitoring the particle size distribution of raw materials<br>Monitoring the particle size distribution of the end product |
| **5. Specification:** | **Name :** DMT Quartz Dust, different particle size<br>**Composition :** Quarz<br>**Material:** Quartz<br>**smallest particle size (µm) :** -<br>**largest particle size (µm) :** -<br>**Substance density (g/cm³) :** 2,65<br>**Apperance :** solid<br>**Hardness (Mohs):** 7,0<br>**Colour :** white |
