Product Specification

DMT Bank Note Dust

TÜV NORD Systems GmbH & Co. KG
Plant & Product Safety
Refrigeration & Air Quality

Am TÜV 1
45307 Essen, Germany

1. General description:	Test dust for use in filter and environmental tests. More information can be found in the Downloads section.
2. Composition:	The particle size distribution of DMT Bank Note Dust is between 0 - 100 µm.
3. Transport and Storage:	Partial segregation may occur during transport and storage. It is therefore recommended to homogenize the DMT Bank Note Dust before use, which can be achieved by mixing with a laboratory tumbler mixer. Please store in a dry and airtight original container.
4. Quality ensurance:	In order to achieve reproducible quality, the raw materials and production are strictly controlled. The following quality controls are carried out: Monitoring the particle size distribution of raw materials Monitoring the particle size distribution of the end product
5. Specification:	**Name :** DMT Bank Note Dust **Composition :** Calcium magnesium carbonate **largest particle size (µm) :** 100 **Apperance :** solid **Hardness (Mohs):** 3,5 **Colour :** white
