|----------------------------------|--|
| 1. General description: | Test dust for use in filter and environmental tests. More information can be found in the Downloads section. |
| 2. Composition: | The particle size distribution of DMT Beech Wood Coal Test Dust up to 100 my is between 0 - 100 µm. |
| 3. Transport and Storage: | Partial segregation may occur during transport and storage. It is therefore recommended to homogenize the DMT Beech Wood Coal Test Dust up to 100 my before use, which can be achieved by mixing with a laboratory tumbler mixer. Please store in a dry and airtight original container. |
| 4. Quality ensurance: | In order to achieve reproducible quality, the raw materials and production are strictly controlled. The following quality controls are carried out:

Monitoring the particle size distribution of raw materials
Monitoring the particle size distribution of the end product |
| 5. Specification: | Name : DMT Beech Wood Coal Test Dust up to 100 my
Composition : Coal
Material: Wood
largest particle size (µm) : 100
Substance density (g/cm³) : 1,42
Apperance : solid
Hardness (Mohs): 0,5
Colour : schwarz |
