Measuring scoop 100 ml

DMT GmbH & Co. KG
Plant & Product Safety
Refrigeration & Air Quality

Am TÜV 1
45307 Essen, Germany

1. General description: This measuring vane made of white coloured polypropylene (PP) has a volume of 100 ml.

It is also suitable as a weighing shovel and has a precisely shaped filling edge. When the bucket is full over this filling edge, it contains exactly 100 ml.

A comfortable and stable handle ensures good handling; the volume information is clearly legibly displayed on this handle.

Capacity = 100 ml
length = 200 mm
